Ins 45Th Annual Meeting: New Orleans 2017
Continuing Education Program
Disclosure Information

As of December 15, 2016

The International Neuropsychological Society requires program planners and instructional personnel to disclose information regarding any relevant financial and non-financial relationships related to course content prior to and during course planning.

The intent of this disclosure is not to prevent a speaker with a significant financial or other relationship from making a presentation, but rather to provide listeners with information on which they can make their own judgments. It remains for the audience to determine whether speaker interests or relationships unduly influence a presentation with regard to exposition or conclusion.

Please note relevant relationship definitions below:

Relevant financial relationships are those relationships in which the individual benefits by receiving a salary, royalty, intellectual property rights, gift, speaking fee, consulting fee, honoraria, ownership interest (e.g., stocks, stock options, or other ownership interest, excluding diversified mutual funds), or other financial benefit. Financial relationships can also include “contracted research” where the institution receives/manages the funds and the individual is the principal or named investigator on the grant.

Relevant non-financial relationships are those relationships that might bias an individual including any personal, professional, institutional, or other relationship. This may also include personal interest or cultural bias.

Ins Program Planners

Gonzalez, Raul (CE Director):
No relevant financial or nonfinancial relationships exist.

Hampstead, Ben (Program Chair):
No relevant financial or nonfinancial relationships exist.

Instructional Personnel

Andersen, Richard (Plenary 4):
