

Early Career Research Award Winners

Recognition of an individual who is less than 10 years post completion of training, and who has made a substantive independent contribution to research in the area of brain-behavior relationships. Early Career: in the early (e.g., within first 10) years after completing doctoral training, postdoctoral fellowship or resident training, or the terminal degree as appropriate for the nominee's discipline and country. Consideration will include achievements prior to obtaining the degree or completion of training. Candidates will be expected to have, at minimum, a national reputation, with the potential to have an international reputation, as recognized by peers and appropriate productivity.
